

The ToolPak Original, #90650

The Safer, Hands-Free Way to Carry Your Tools

ToolPaks are inherently safer than tool boxes or bags for one simple reason-- you have your hands free while you carry them. Your hands are free to hold onto more important things like, safety railings, ladder rungs and even your morning coffee.

Elevator technicians rely on the ToolPak's compact organization, soft-sided total enclosure and ergonomic design to improve efficiency, safety and worksite readiness. ToolPaks are carried on your back and do not extend past your waist, eliminating snagging on elevator machinery.

ToolPaks are widely used by business, industry and government. HVAC technicians and installers, elevator maintenance, photocopy repair, power generation plant technicians, oil exploration maintenance and

technicians rave about the ToolPak Original.

In the armed forces in the US and Canada, you'll find ToolPaks used by the Army, the Navy's Trident Fleet, Coast Guard, Air Force, their B-2 Bomber Squadrons, as well as Government agencies including CIA, FBI, White House Communications Staff, USPS, USFS, Department of Homeland Defense and a variety of enforcement agencies and many more.

The ToolPak Original's features are---

- Patent number 5,209,384.
- 106 pockets and holders utilizing a unique system that keeps tools in place.
- Fully Adjustable Pockets: Don't have a pocket that fits a tool? Carefully select the location, then remove the stitch-line between two pockets and voila; a bigger pocket.
- Rigid panel design made from layers of waterproof, 1000 denier nylon creates a water-proof exterior to protect tools from moisture.
- Ergonomic shoulder straps with convenient utility loops.
- Comfortable, heavily-padded back panel.
- Padded handles.

Each pack has six individual panels including:

1. Large Document Panel with room for large tools or a laptop
2. Screwdriver Panel with 30 holders for screwdriver-like tools up to 18 inches long.
3. Pliers Panel with 9 pockets for pliers-shaped tools
4. Utility Panel with 16 pockets for tools up to 16 inches tall
5. Wrench Panel with two wrench organizers; a 14 pocket organizer for a set ranging from 3/8" to 1 1/4" and a 9 pocket organizer for small electrical wrench sets 1/8" to 5/16"
6. Socket Panel with 20 elastic holders with stop pockets to keep tools from sliding out and 9 pockets for drives, extensions and socket bars.

Two outside pockets:

1. The top pocket is big enough for a cordless drill (Your drill may require the battery to be removed) and a specialized Trouble Light Loop with quick-release buckle. which are large enough for our Inside Organizers, drills and drivers, meters and sensors, safety equipment.
 2. The bottom one is large enough for our Inside Organizers, drills and drivers, meters and sensors, safety equipment.
- Lockable, Heavy-duty ToolPak Brand Zippers.
 - Attach your optional waist strap to the waist-strap anchor located at the bottom of the shoulder strap.
 - Made from layers of waterproof, 1000 denier nylon.
 - Dimensions: 18.5" X 14" X 3" to 10" (Depending Upon The Contents)
